

Mobile Data Collection

This mobile tracking service uses data collected from mobile phone users who have agreed within their apps and phone settings to enable location information. By drawing a polygon around a specific business or location we are able to gather valuable data about the customer base that has actively used their mobile device while in the identified location. This tool allows us to see where customers are coming from to shop in your market using actual data. This information is used to optimize your trade area, analyze business locations, compare frequency of visitors, and assist retailers in site selection. This is intended to support the trade area, but does not solely define the trade area.

The location tracked was

La Marque Sam's Club

for the time period of

August 2018

To

August 2019
